Increasing technological advances have an impact on everyday life. In general, there are pros and cons regarding whether or not the conventional legal system can regulate activities in cyberspace, namely the use of other people's credit cards, banking transactions, the use of other people's secret codes (PINs) for cash withdrawals at ATMs, electronic engagements or contracts, use of domains belonging to other people that violate intellectual property rights, Creating, providing, sending or deleting computer data which results in disruption of system function, Creating, providing, sending or deleting computer data which results in economic losses for other people, accessing computer networks with the intention of stealing data (hacking). What is the process of investigating criminal cases of accessing other people's electronic systems at the East Tanjung Jabung Resort Police, Obstacles in carrying out the process of investigating criminal cases of accessing other people's electronic systems at the East Tanjung Jabung Resort Police, Efforts to overcome obstacles in the process of investigating criminal cases of accessing electronic systems belonging to other people at the East Tanjung Jabung Police. The research method used is standard, logical and systematic, namely analytical descriptive research, a descriptive study intended to provide data that is as accurate as possible. Meanwhile, the type and approach of research uses empirical juridical methods, where this approach examines and examines conditions in terms of aspects including human resources, economic ideology, cultural and legal situations. As well as the provisions contained in the applicable laws and regulations, both contained in the Criminal Procedure Code, as well as other regulations related to the implementation of the law in the investigation process in criminal cases of accessing other people's electronic systems at the East Tanjung Jabung resort police. Meanwhile, the data sources used are library research, field research and sampling techniques using purposive sampling.
