ABSTRACT

(Akhmad Bilal Septiadi / 1900861201162 / 2024 / *The Influence of Current Ratio, Return On Assets, Debt to Equity Ratio, and Earning Per Share on Share Prices in the Coal Mining Industry Sub-Sector on the Indonesian Stock Exchange for the 2018-2022 Period / Advisor* I st Dr. Ali Akbar, SE, MM, CRP, *Advisor* 2 nd Ira Febrianti SE., M.S.Ak)

Current Ratio, Return On Assets, Debt to Equity Ratio, and Earning Per Share play a very important role in share prices. Therefore, the aim of this research is to describe the Current Ratio, Return On Assets, Debt to Equity Ratio, Earning Per Share and Share Prices in the Coal Mining Industry Sub-Sector on the Indonesian Stock Exchange for the 2018-2022 Period, as well as analyzing the influence of the Current Ratio, Return On Assets, Debt to Equity Ratio, and Earning Per Share on Share Prices in the Coal Mining Industry Sub-Sector on the Indonesian Stock Exchange for the 2018-2022 Period simultaneously and partially.

The research method in this research is descriptive and quantitative. The population of this research is companies registered on the IDX in the Coal Mining Industry for the 2018-2022 period, totaling 19 companies. Based on the sampling criteria, there are 7 companies that meet the criteria where their net profit is continuously positive in the 2018-2022 period.

Data analysis uses SPSS Ver 23 and uses a multiple linear regression model with the calculation results $Y = \alpha + \beta_1 X_1 + \beta_2 X_2 + \beta_3 X_3 + \beta_4 X_4 + e$. Multiple linear regression model with results $Y = 955.842 + 0.679 X_1 + 0.458 X_2 + 0.594 X_3 + 0.200 X_4$. The constant is 955.842. The Current Ratio (X1) regression coefficient is 0.679, the Return On Asset (X2) regression coefficient is 0.458, the Debt to Equity Ratio (X3) regression coefficient is 0.594 and the Earning Per Share (X4) regression coefficient is 0.200.

The coefficient of determination = R square (R2) is 0.913. This figure states that the Current Ratio (X1), Return On Asset (X2), Debt to Equity Ratio (X3), and Earning Per Share (X4) variables are able to explain the Share Price (Y) variable by 91.3% and the remaining 8.7% is explained by other factors.

Current Ratio (X1), Return On Assets (X2), Debt to Equity Ratio (X3), and Earning Per Share (X4) simultaneously and partially influence the share price (Y) in the Coal Mining Industry Sub-Sector on the Indonesia Stock Exchange 2018-2022 period.
