ABSTRACT

Randa Saputra, 2025. Efforts to Combat Mobile Phone Theft by the Operational Tiger Team of the Danau Teluk Police Criminal Investigation Department. Ms. Syarifah Mahila, S.H., M.H. and Ms. Nella Octaviany Siregar, S.H., M.H.

Keywords: *Prevention Efforts, Theft, Mobile Phone, Operational Tiger Team of the Criminal Investigation Department*

The Danau Teluk Police Criminal Investigation Team successfully arrested a cellphone thief who was disturbing residents. This operation was a rapid response to reports of lost cellphones in the area. Based on the investigation and evidence collected, the perpetrator and evidence were successfully secured. This arrest is expected to have a deterrent effect and increase the public's sense of security. The research method used in this study is an empirical juridical approach with a socio-legal research framework. This study combines primary data sources obtained through fieldwork and secondary data sources from literature reviews. Data collection techniques included interviews and document studies. The sampling technique used was purposive sampling, while data analysis is presented through a qualitative approach. The results of this study are efforts to overcome the crime of mobile phone theft by the Operational Tiger Team of the Criminal Investigation of the Teluk Lake Sector Police are repressive efforts in the form of direct arrests of perpetrators if they receive reports from the public and preventive efforts such as increasing routine patrols in areas considered vulnerable, providing public order and security appeals to residents and socialization activities about the latest modus operandi of mobile phone theft crimes to the people of Jambi City and obstacles in carrying out efforts to overcome the crime of mobile phone theft by the Operational Tiger Team of the Criminal Investigation of the Teluk Lake Sector Police are difficulties in the process of collecting evidence, lack of detailed information from the victim regarding the characteristics of the perpetrator, the perpetrator of mobile phone theft has a relationship with the victim, unclear information from eyewitnesses, the victim did not record the IMEI number of the mobile phone, the Teluk Lake community is reluctant to make a report to the Teluk Lake Sector Police regarding mobile phone theft cases and the limitations of the digital forensic tools of the Teluk Lake Sector Police.
