

## DEDICATION

In the name God, the Most Compassionate and Merciful. All praise is due to God, for His never-ending grace, strength, and guidance that have brought me to the completion of this thesis. Every step of this journey was made possible only through His will, and for that, I am deeply grateful.

With love, gratitude, and heartfelt appreciation, I dedicate this work to:

My beloved parents, Yesi Tan and Arifin, thank you for your unconditional love, endless prayers, and unwavering support. You are my biggest inspiration, and your sacrifices have shaped who I am today. Your wisdom and constant encouragement have been a guiding light in my life.

To all my respected lecturers and academic mentors, thank you for sharing your knowledge, wisdom, and patience with me throughout my years of study. A special note of gratitude to Dr. Suyadi, S.Pd., M.A. as my first supervisor and Khidayatul Munawwaroh, M.Pd. as my second supervisor thank you for your time, guidance, and insightful feedback. I also sincerely thank my examiners, Dr. Yanti Ismiyati, S.Pd. M.Pd. as my main examiner and Siti Aisyah, M.Pd. as my second examiner, for your valuable suggestion and advice during the final steps of this academic journey.

To all my college friends who shared both the struggles and the laughter along the way, thank you for making this journey memorable. Thank you for your friendship, support, and all the moments we've shared.

May God bless each and every one of you for your role in my life and for helping me reach this milestone.

## **ABSTRACT**

**Christoper, Bryan. (2025). The Influence Of The Hangman Game On The Students' Vocabulary Mastery For 10TH Grade Of SMAN 8 Jambi City. A Thesis. English Education Program Teacher Training Education Faculty Batanghari University Jambi. The First Advisor Dr.Suyadi,s.Pd.,M.A. The Second Advisor Khidayatul Munawwaroh, M.Pd.**

This research aims to investigate the influence of the Hangman game on the vocabulary mastery of 10th-grade students at SMAN 8 Jambi City. The study was conducted using a pre-experimental method with two groups of classes: an experimental class taught using the Hangman game and a control class taught using the conventional methods. Data were collected through a test administered before and after the treatment. The results revealed that the students in the experimental class showed an improvement in their vocabulary mastery. These findings suggest that incorporating the Hangman game as a supplementary teaching strategy not only improves learning outcomes but also motivates students through active participation and enjoyable practice. Therefore, it is suggested that English teachers should consider implementing the Hangman game or a similar interactive game to create a more engaging learning environment.
